

Fluted

"Flat Engerering Sheet"

~ Overview

This is a fluted plastic extruded material that provides excellent durability in door applications. It is favoured by industry for its lightweight structure and competitive prices.

~ Main Benefits

Fluted Board is more durable than corrugated fibreboard, lighter weight than wood and both chemical and water resistant.

~ Application

It has a wide variety of industrial, artistic and decorative uses. It is very receptive to adhesives, vinyl, and lettering and can be screen-printed. It cuts, creases, staples and stitches easily to form three-dimensional shapes, even display stands. This product is ideal for internal and external POS sales applications e.g. signage typically used by estate agents.
